

# Save Time and Money Take Your Fleet Expense Management Digital!

## Edenred Essentials Visa Fleet Card Solution

**Edenred Essentials Visa Fleet Cards** offers modern fleet expense management features including fuel, EV charge, in-store purchases, vehicle registration, highway tolls, car washes, maintenance and other day-to-day payment needs to keep your fleet vehicles moving from one job to another without roadblocks– all with digital real-time, easy-to-use advanced controls, and simple one-click quick action buttons.

Our dashboard offers you “data-at-a-glance,” so you’ll no longer have to hunt around for declined transactions, available credit, and totals by exception. You can forget spending spending a lot of time searching around for the data you need NOW online from your desk or on the go through our mobile app. We also include instant email and text notifications.

Obtaining real-time data quickly has never mattered more in our evolution to digitalization. Edenred Essentials provides:

### Real-time controls and notifications

Affording you the ability to know and **control** where you stand with fleet expenses and utilization any time of the day or night.

### Greater efficiency and reduced costs

We offer a fully digital, mobile-first interface reducing time spent gathering and reviewing fleet receipts with an all-in-one online dashboard view.

### Purchasing fuel or more than fuel anywhere Visa is accepted

No more worries about staying “in network”. Edenred Essentials frees your drivers to make purchases for fuel and EV charging, maintenance, tolls, and in-store convenient items anywhere Visa is accepted.

### Workforce empowerment

Seamless functionality between desktop and mobile applications allowing rapid-response decision-making, by accessing the essential expense data from on the road or in the office immediately.

Fleet cards, including driver interface, receipt management and management dashboard portals are becoming wholly digital with Edenred Essentials Visa Fleet card at the forefront. Fleet managers need solid, real-time data. Fleet and vehicle expenses of all shapes and amounts need to be tracked, monitored and as up-to-date as possible.

All this information contains important data for the fleet manager – data which can determine budget forecasting, future fuel consumption by individual drivers, vehicles, and the entire fleet. Cost information that details where every penny is spent, can also reveal red flags such as non-sequential odometer readings or fuel purchases that take place after normal work hours.

Edenred Essentials is a fully digital enterprise with seamless communication between android and iOS mobile devices and desktop computers. Items like paper receipts are fast becoming relics. Paperless is no longer the exception but, rather, the rule.

Another plus included with this new digital framework is that you need not fear that accountability will be compromised, as fleet management solutions offer an audit trail making it very simple to go through and see who fueled up, when, where and at what time.

## How much can you save?

**\$10,000 / Year**

Potential Annual Savings with Edenred Essentials

Based upon

**5 Weekly Hours Managing Fleet Cards**  
**\$80,000 Annual Salary**

### Keep it simple!

Edenred Essentials keeps it simple. Our research informs us that the more complex and time-consuming a fleet card platform is, users tend to enter the bare minimum of information or skip the process until it can no longer be avoided.

Part of this is because fleet management tasked with overseeing fleet operations have more than a few matters to take care of during their workdays, and the other reason is that employees who don't feel comfortable and confident with their current fleet card solution, tend to use it as little as possible. Yes, it may have all the bells and whistles, but that doesn't mean much if it's not being utilized because of clunky manual controls, delayed data, an unresponsive customer service team, or doesn't provide real-time information and notifications.

Edenred Essentials, a preferred partner of Visa, checks every box on your wish list when it comes to the choice of a fully digital, user-friendly fleet expense management solution.

As sometimes happens, drivers can encounter issues at the pump which can quickly escalate to driver and fleet manager frustration, and lead to decreased productivity. We'll never leave you stranded at the pump. With our **real-time notifications**, events such as declined transactions, let fleet managers or admins

know when to adjust a card's credit limit to avoid expensive time delays, and the ability to resolve a host of other problems - **immediately** - from anywhere and at any time. Our focus is to keep your business moving.

If, as a fleet administrator, you find yourself out of the office and on the go, you can easily change spending limits, add restrictions, and modify PINS for your drivers with our mobile app, available on both Android and iOS devices. If you're out in the field, you're not out of touch. You have control and portability wherever you go.
